PRODUCT ADVICE

LAKELAND AIR PURIFYING PAINT

Lakeland Paints offer a completely unique range of decorative finishes. It's the only range of totally solvent-free paints available anywhere in the world today, independently tested to reveal 0.0% VOCs (Volatile Organic Compounds).

VOCs are a major contributor to low-level atmospheric pollution and the use of these compounds leads to global warming. In addition, the use of solvent-based paints is a major cause of, asthma, allergies, sick building syndrome, chemical sensitivities and the general flu-like symptoms reported by many people using conventional paints, including Matt and Silk wall paints.

Most paints currently on sale, both gloss and emulsion, contain solvents and VOCs. Lakeland paints contain none.

As a result they are ideal for use throughout the home, particularly children's bedrooms, nurseries and kitchens, especially if you or a member of your family is chemically sensitive or suffers from asthma or allergies.

Where to use:

Interior walls and ceilings. Lakeland Atmosphere gives a pleasant, wipeable matt finish. Not ideal for areas subject to very frequent wetting. Molecular sieves can remove VOCs & Formaldehyde down to ~ 1 PPM.

Availability:

In 5 litre tins in 180 LAKELAND colours plus white. Available direct from Lakeland Paints.

Coverage: 60m² per 5 litre/per coat depending on surface porosity

Drying time: Touch dry in 1 hour. Recoatable after 2 hours.
