

LAKELAND *paints*

PRODUCT ADVICE

LAKELAND ALGICIDE SOLUTION

LAKELAND paints offer a completely unique range of decorative finishes. It's the only range of totally solvent-free paints available anywhere in the world today, independently tested to reveal 0.0% VOCs (Volatile Organic Compounds).

VOCs are a major contributor to low-level atmospheric pollution and the use of these compounds leads to global warming. In addition, the use of solvent-based paints is a major cause of, asthma, allergies, sick building syndrome, chemical sensitivities and the general flu-like symptoms reported by many people using conventional paints, including Matt and Silk wall paints.

Most paints currently on sale, both gloss and emulsion, contain solvents and VOCs. LAKELAND paints contain none.

As a result they are ideal for use throughout the home, particularly children's bedrooms, nurseries and kitchens, especially if you or a member of your family is chemically sensitive or suffers from asthma or allergies.

Where to use:

Water based low-toxicity algae, slime, lichen & moss remover = for patios, paths, stonework, paving, slates, walls, brickwork, concrete etc and timber. Simple and easy to use - simply apply and leave to dry - no scrubbing necessary. Contains no toxic algicides - kind to the environment. No restrictions on residues entering drains and water courses. Gives excellent long-term protection against re-growth, normally for up to 9 months. The special ingredients bond with the surface to which they are applied & become an intrinsic part of the structure below, making re-growth very difficult.

Availability:

In 5 litre plastic containers. Available direct from Lakeland Organic Paints.

Coverage: 5-15m² per litre depending on surface porosity.

Application:

Apply in DRY weather when the surface is totally dry - by brush, roller or preferably garden spray and leave to work. A noticeable "seaweed" smell is normal & indicative of die-back. Depending on the weather and the level of algal growth, the algae will be destroyed instantly & disappears by weathering & erosion over several days. DO NOT RINSE OFF. Do not use when rain is forecast.

IMPORTANT- may be slippery underfoot until the algae is removed/destroyed. If contamination is particularly heavy a second application may be needed after several days.

Precautions:

Lakeland Paints, Unit 19, Heysham Business Park, Middleton Road, Heysham, LA3 3PP
01524 852371 www.lakelandpaints.co.uk

The product is alkaline and must be prevented from coming into contact with eyes - suitable eye protection should be worn. It is recommended that the product does not come into contact with skin. Wear gloves or wash off any splashes quickly. Whilst the product can be sprayed this should only be carried out by NON-MISTING, NON AEROSOL low pressure liquid garden spray under conditions that ensure the control of overspray due to the alkaline nature of the product.

DO NOT ALLOW TO COME INTO CONTACT WITH CLOTHING, FURNISHINGS OR CARPETS AS DAMAGE MAY RESULT - nb. CONTAINS BLEACHING AGENTS.

KEEP OUT OF REACH OF CHILDREN.

Harmless to plants & animals once dried & used as directed

Storage:

This product is water based and must be protected from frost, light and extreme temperatures. Use within 12 months of purchase. We accept no responsibility for the deterioration of contents or packaging after this.

Disposal:

Though water based, please do not dispose of bulk amounts into watercourses. Waste materials must be disposed of in accordance with the Environmental Protection Act 1990 and relevant regulations made thereunder. For further information contact the Environment Office at your local council.

Health & Safety:

Ensure good ventilation during application and drying. Avoid contact with skin and eyes. In case of contact with eyes, rinse immediately with plenty of water and seek medical advice. After contact with skin wash immediately with plenty of soap and water or a proprietary skin cleanser. Keep out of reach of children.

Safety Data Sheets are available on request.
