

LAKELAND *paints*

PRODUCT ADVICE

LAKELAND COVER-UP PAINT

LAKELAND paints offer a completely unique range of decorative finishes. It's the only range of totally solvent-free paints available anywhere in the world today, independently tested to reveal 0.0% VOCs (Volatile Compounds).

VOCs are a major contributor to low-level atmospheric pollution and the use of these compounds leads to global warming. In addition, the use of solvent-based paints is a major cause of, asthma, allergies, sick building syndrome, chemical sensitivities and the general flu-like symptoms reported by many people using conventional paints, including Matt and Silk wall paints.

Most paints currently on sale, both gloss and emulsion, contain solvents and VOCs. LAKELAND paints contain none.

As a result they are ideal for use throughout the home, particularly children's bedrooms, nurseries and kitchens, especially if you or a member of your family is chemically sensitive or suffers from asthma or allergies.

Where to use:

Interior walls & ceilings. This Superior Super Matt Wallpaint is specially formulated to conceal and hide minor to moderate surface imperfections & fill hairline cracks on interior walls & ceilings. It does this by eradicating reflectance from the surface to which it is applied & is very effective at masking such unsightly surfaces, giving a very pleasing soft, even & flat architectural appearance.
