

LAKELAND *paints*

PRODUCT ADVICE

LAKELAND STABILIZING SOLUTION

LAKELAND paints offer a completely unique range of decorative finishes. It's the only range of totally solvent-free paints available anywhere in the world today, independently tested to reveal 0.0% VOCs (Volatile Compounds).

VOCs are a major contributor to low-level atmospheric pollution and the use of these compounds leads to global warming. In addition, the use of solvent-based paints is a major cause of, asthma, allergies, sick building syndrome, chemical sensitivities and the general flu-like symptoms reported by many people using conventional paints, including Matt and Silk wall paints.

Most paints currently on sale, both gloss and emulsion, contain solvents and VOCs. LAKELAND paints contain none.

As a result they are ideal for use throughout the home, particularly children's bedrooms, nurseries and kitchens, especially if you or a member of your family is chemically sensitive or suffers from asthma or allergies.

Where to use:

As a sealer-stabilizer pre-treatment before painting; for porous exterior and interior concrete, masonry, brickwork, mortar, render, plaster etc.

Availability:

In 1 and 5 litre plastic containers. Available direct from Lakeland Paints.

Coverage: 7-14m² per litre (depending on surface porosity)

Drying time: Touch dry in 1 – 2 hours

Preparation:

Ensure the surface is dry and remove as much loose, flaking or dusty material as possible.

Application:

Shake or stir before use. Apply one coat by brush, roller or spray. DO NOT THIN. Allow to dry thoroughly before overcoating. Do not apply when rain or frost are expected. Avoid use below 5°C, above 25°C and in direct sunlight.

Clean up:

Clean brushes and rollers with warm soapy water.

Storage:

Lakeland Paints, Unit 19, Heysham Business Park, Middleton Road, Heysham, LA3 3PP
